

Dear reader,

Alvito provides you with solutions to use the power of water for your health and our environment.

Alvito is a German brand and a specialist for high-quality water products for more than seven years.

Take care of our environment and follow new paths together with Alvito

With the Alvito washing system, the yearly consumption of washing liquid is approx. 1 kg per person. Compared to this, the yearly consumption of conventional detergents is approx. 7 kg per person.

Additionally conventional detergents often contain critical chemicals: optical brightener, aromatic substances, artificial colourings, genetically manipulated enzymes etc.

Residues of these detergents remain in the textiles and are constantly in contact with your skin, day and night. The best you can do for your health is to use the Alvito system and avoid this risk.

An idea becomes reality with the help of innovative formulas:

- Only a minimum of residues should remain in the textiles or on the dishes.
- All ingredients should be good for the consumer and the environment.
- Using the dishwashing or the washing ring the consumption of detergents is very low.
- The dishes and textiles are excellently clean.
- The textiles are very soft, that means a good feeling on your skin.

Textile washing system

Alvito washing ring

Washing liquid

The starter kit includes additionally: dispenser, measuring spoon and dishwashing introduction for the Alvito dishwashing system.

The washing ring is the *Heart* or what makes the Alvito system so special.

Long-term guarantee:

The Alvito washing ring is guaranteed for seven years.

The Alvito washing ring - just unique

For the benefit of your health and our environment the Alvito washing ring uses smart physics instead of a lot chemicals. By increasing the natural cleaning power of the water the washing ring makes it possible to reduce the consumption of detergents dramatically.

With the help of a physical technology, there is a ultrafine oscillation imprinted in the washing ring. According to the principle of resonance this oscillation will be transmitted to the water.

The handling is very simple: Just put the ring in the dishwasher or in the washing machine so that it can influence the water during the complete cleaning process.

Advantages for our *environment*

- high-quality concentrates make it possible to save detergents and consequently reduce the expenditure of raw materials, energy, transport and packaging
- all ingredients are quickly and completely biodegradable
- tensides made of regrowing raw materials

Advantages concerning the

handling

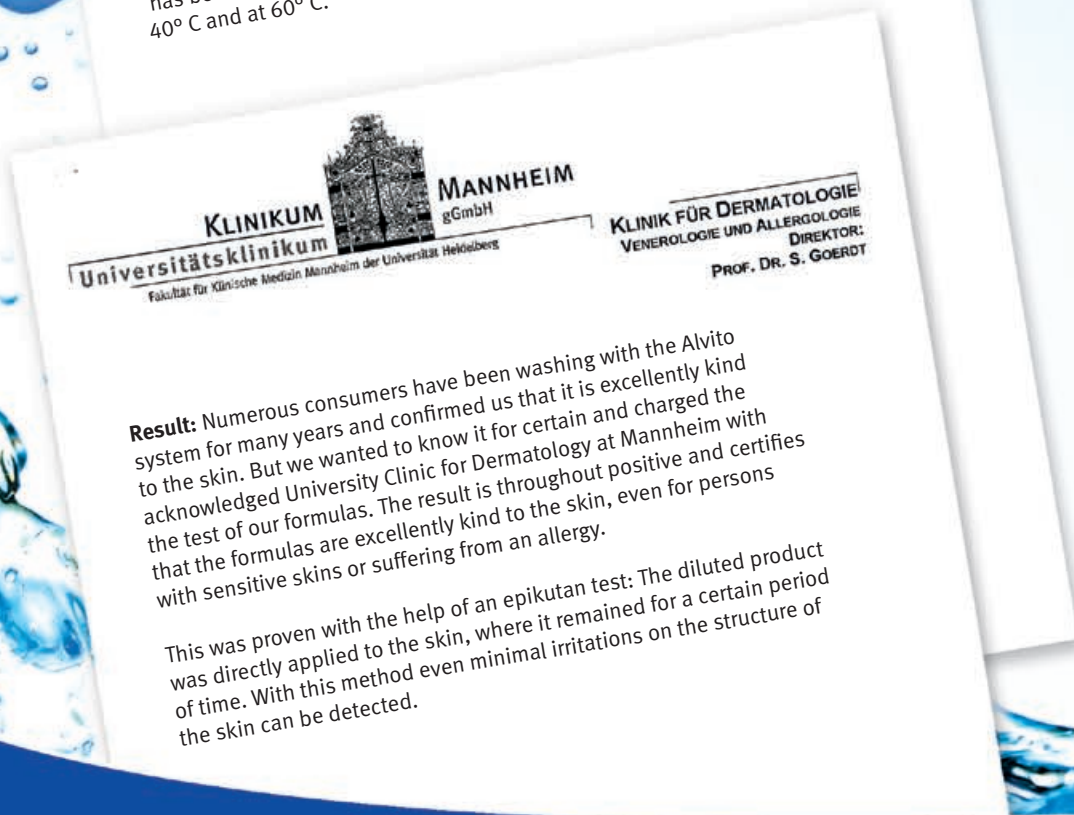

- suited for all temperatures and materials
- economic dosage and individual combination of additives
- easier ironing
- physical protection from lime for the washing machine and the dishwasher
- simple modular construction system
- comfortable due to delivery by parcel service

Advantages for your

health

- especially suited for health-conscious and critical consumers
- a real relief for persons suffering from an allergy or with sensitive skin
- kind to the skin textiles for a good feeling
- clean dishes for health-conscious consumption

Tests show ...

... and that's what our *customers* told us ...

Concerning the Alvito washing system:

The handling of the washing system is simple and, concerning the cleanness, it lets nothing to be desired. The textiles are soft and you feel good wearing them. Ironing is easier and the textiles don't crumple so fast.
(Markus H. / Wettingen)

Excellent washing results, the textiles are soft, clean and smell good. The handling is simple and the customer service is great! The Alvito washing system is convincing and it is good for our environment and our water too.
(Rebecca W. / Aarau)

Especially persons suffering from an allergy should know this product.
(Irma R. / Schlieren)

I'm very satisfied with the cost effectiveness of the Alvito washing system. The concentrate lasts very long, although I have to wash every two days. Great!
(Thurid A. / Stuttgart)

We are delighted by the Alvito dishwashing and washing system, because we are so glad to have our meals from non toxic plates and to wear clothes without any toxic residues.
(R. Rösler / Schwabmühlhausen)

Concerning the Alvito dishwashing system

After having tested a lot of conventional and ecological detergents, we finally found a system which is very efficient, good to our environment and economical too.
(Anke C. / Tönning)

The dishes are brilliantly clean, the result is at least as good as with conventional detergents, even with the half quantity of powder. I'm very satisfied: Our environment is protected and, in the long run, you will save money.
(Enrico F. / Burg)

And the next step?

Don't hesitate and test the washing and the dishwasher system right now and you will have at once a good feeling on your skin. You only keep the products if you are really satisfied and if you want to use the advantages.

If you are not satisfied within 30 days (it doesn't matter what the reason is), you just send us the rings and the remaining detergents back.

✓ The consumer products are available in reasonably priced refill packages.
